10 Great Web Development Learning Project Ideas

Static Web applications are good options for building Web sites that contain information that doesn't change often. A dynamic Web application can provide changing (dynamic) content to the user. In a dynamic Web application, the Web application server does something with the resource after reading it from the file system and before sending it to the user's Web browser.

IBM Developer : New to Web Development

When building a web app, performance is usually compromised. JavaScript limitations make heavy calculations slow, and that significantly affects user experience. This is why most of the popular games and powerful applications are only available as a native desktop app. WebAssembly is here to change the game.
